FOR IMMEDIATE RELEASE

Bicycle/Pedestrian Shuttle Service for Willow/101

A feature of the U.S. 101/Willow Interchange Improvement Project

Menlo Park — Starting Monday morning, Caltrans will provide a shuttle service for bicyclists and pedestrians who need to cross over U.S. 101 on Willow Road in Menlo Park. Currently, bicyclists and pedestrians use the existing overpass. Caltrans is demolishing that structure as part of the U.S. Route 101/Willow Road Interchange Improvement Project, and will replace it with a new, up-to-date overpass.

The new overpass will provide wider sidewalks, a dedicated bicycle lane, and eight lanes for motor vehicles. The project will also widen and realign the on and off ramps and the adjacent frontage roads.

The shuttle service will start at 7:00 am Monday, July 31. It will operate 24/7, and will be on-demand. Call (415) 263-4000 to arrange a pickup. It will remain in service roughly until October of 2018.

More information about the project is available on the web site:
